

The Housing Land Supply statement of 1 October 2018 contains information which is very useful to the examination. I would like to know the basis on which the Council has estimated the trajectory for the period Oct 2023 to the end of 2027/28. Essentially this is how the Council has arrived at the figures which show projected annual completions in Appendix 7. Could this be made available to me?

Thanks

Mike Worden
